

Blurb KASIMIR EFFEKT

KASIMIR EFFEKT is a Hanover, Germany based project exploring the realms of electronic music.

A microcosm of sound evolves from the hands of the three musicians. Layered technoid improvisations and fluctuating beats bloom and build, bursting into flower out of the void of silence. When performing live with double bass, drums and Fender Rhodes, the three musicians will present you handmade analogue sounds that could hardly be more danceable.

Watch out, elementary particles: reduction = reaction
Welcome to KASIMIR EFFEKT.

KASIMIR EFFEKT are:

Julius Martinek: Fender Rhodes, electronics

Johannes Keller: double bass, electronics

Tobias Decker: drums
